PROFESSIONAL EXPERIENCE

Full-Stack Developer (Freelancer)

July 2024 – Present

Self-Employed

Remote

- Delivered end-to-end web solutions for clients across e-commerce and marketing sectors, managing full project lifecycle from requirements gathering to deployment and maintenance.

Benta925 - E-commerce & Management Platform

July 2024 – March 2025

- Built full-stack e-commerce solution for jewelry business, increasing online orders by 240% through WhatsApp checkout integration. Implemented secure admin panel with product management (CRUD), sales ledger, and automated catalog for 100+ products across 7 categories.
- Stack:** React, TypeScript, TanStack Router, Node.js, Express, Prisma, PostgreSQL — [Live](#) — [Code](#)

Z - Social Media Application

September 2025 – November 2025

- Engineered full-stack X clone with nested reply threads, infinite scroll feed, and dual authentication (email/password + GitHub OAuth). Reduced perceived load time by 45% through optimistic UI updates and TanStack Query caching strategies.
- Stack:** React, TypeScript, TanStack Router/Query/Form, Bun, Hono, PostgreSQL, Drizzle ORM — [Live](#) — [Code](#)

Frontend Developer (Freelancer)

August 2024 – March 2025

Snap Group

Remote

- Developed three high-conversion landing pages for insurance and health companies optimized for Facebook Ads, improving mobile conversion rate by 32% through responsive design and sub-2-second load times.
- Stack:** React, TypeScript, Next.js, TailwindCSS — [Live](#)

Frontend Developer

November 2025 (1 week)

Bugless (Borderless Coding Hackathon)

Remote

- Led frontend development for AI-powered code review tool in 5-person team. Built landing page and dashboard for CLI tool and GitHub App providing instant feedback on bugs and security vulnerabilities.
- Stack:** Next.js, TypeScript, TailwindCSS — [Code](#)

OPEN SOURCE CONTRIBUTIONS

react-tanstarter | TanStack Start Template (839+ stars)

September 2024

- Optimized authentication flow by removing redundant data loader, improving performance and code maintainability. [Repository](#) — **PR #26**

EDUCATION

Self-Taught Developer

January 2024 – Present

Project-Based Learning

- Built 21+ projects progressing from HTML/CSS/JavaScript fundamentals to full-stack applications. Created educational YouTube content (@leevydev) with 519+ subscribers and 9,400+ views teaching web development.
